

# Unbedingt vor dem Einbau der Erweiterung eine Datenbanksicherung und eine Sicherung der Datei checkout\_process.php machen !!!

## Anleitung für XTC Shop 3.0.4 SP1

### 1. Folgendes SQL-Statement in Ihrer Datenbank ausführen

```
ALTER TABLE `orders_products_attributes` ADD `products_attributes_model` VARCHAR( 32 ) NOT NULL ;
```

### 2. Folgende Zeilen in der Datei checkout\_process.php anpassen:

#### Suche folgende Zeile:

```
$sql_data_array = array ('orders_id' => $insert_id, 'orders_products_id' => $order_products_id, 'products_options' => $attributes_values['products_options_name'], 'products_options_values' => $attributes_values['products_options_values_name'], 'options_values_price' => $attributes_values['options_values_price'], 'price_prefix' => $attributes_values['price_prefix']);
```

#### Ersetzen durch folgende Zeile:

```
$sql_data_array = array ('orders_id' => $insert_id, 'orders_products_id' => $order_products_id, 'products_options' => $attributes_values['products_options_name'], 'products_options_values' => $attributes_values['products_options_values_name'], 'options_values_price' => $attributes_values['options_values_price'], 'price_prefix' => $attributes_values['price_prefix'], 'products_attributes_model' => $attributes_values['attributes_model']);
```

#### Suche folgende Zeile:

```
poval.products_options_values_name,  
pa.options_values_price,  
pa.price_prefix,  
pad.products_attributes_maxdays,  
pad.products_attributes_maxcount,
```

#### Ersetze durch folgende Zeile:

```
poval.products_options_values_name,  
pa.options_values_price,  
pa.price_prefix,  
pa.attributes_model,  
pad.products_attributes_maxdays,  
pad.products_attributes_maxcount,
```

#### Suche folgende Zeile:

```
pa.options_values_price,  
pa.price_prefix  
from ".TABLE_PRODUCTS_OPTIONS." popt, ".TABLE_PRODUCTS_OPTIONS_VALUES." poval,  
".TABLE_PRODUCTS_ATTRIBUTES." pa
```

#### Ersetze durch folgende Zeile:

```
pa.options_values_price,  
pa.price_prefix,  
pa.attributes_model  
from ".TABLE_PRODUCTS_OPTIONS." popt, ".TABLE_PRODUCTS_OPTIONS_VALUES." poval,  
".TABLE_PRODUCTS_ATTRIBUTES." Pa
```

```
ALTER TABLE `products_attributes` ADD `attributes_stock` INT( 4 ),  
ADD `options_values_weight` DECIMAL( 15, 4 ) DEFAULT '0.0000' NOT NULL AFTER  
`attributes_stock` ,  
ADD `weight_prefix` CHAR( 1 ) NOT NULL AFTER `options_values_weight` ,  
ADD `sortorder` INT( 11 ) AFTER `weight_prefix` ,  
ADD `attributes_model` varchar(64) default NULL;
```
